

ABOVE & BEYOND KURIAKOS

The dream of a Lutheran camp on the shores of Sylvan Lake began nearly a century ago with just \$1. Now it is a thriving outdoor ministry serving people of all ages. At Kuriakos we form and build faith, create opportunities for worship and community, and develop the church leaders of the future.

We find ourselves at an inflection point in the history of this sacred space. We have an opportunity to add land that has for years divided our property and limited how we can enhance the ministry that has changed so many lives for the better.

Together we can write the next chapters in this book of faith that is Kuriakos. Your generosity will bring the Gospel alive for our children and grandchildren. Join us as we go Above and Beyond!

Grace + peace,

Rev. Art Weiss
Executive Director

A Vision for a Bright Future

Over the past 90 years, Kuriakos has adapted the ways in which our community lives out our mission to “proclaim the Gospel of Christ, to encourage and disciple.”

The Above and Beyond capital campaign will strengthen and renew Kuriakos’ identity as a place that promotes belonging and fosters faith in the twenty-first century.

As children of God, we are created to be in communion with people and with nature. In an increasingly urban world that is defined by busy-ness, Kuriakos provides a unique, natural, secluded space, a place for retreat and re-creation. Our plans for future growth are the embodiment of our commitment to provide individuals, families and congregations a physical place for them to experience the community and relationships that defines Kuriakos.

We often ask, “where will our future leaders come from?” They come from Kuriakos. Many church leaders, including pastors, have been transformed by Kuriakos and have gone on to serve across Canada and around the world.

This campaign will lay the groundwork to make it possible for more people of all ages and from all walks of life to experience the incredible ministry of Kuriakos.

“Camper growth was especially apparent in measurements of belief.”
